

AWS/ASM Calgary Short Course - Wear Materials for Oil Sands with a Focus on Overlays Applied with PTA

Do you need to select materials for highly erosive environments? Do you want to know more about the types of coating available and where to use them? If you answered yes then you should attend this course.

This course will start by providing an overview of wear resistant coatings and their characteristics and some guidelines on where to use or not use the different coatings. The course will then cover application methods such as PTA, GMAW, GTAW and SMAW with some of the advantages and disadvantages of each method. In particular PTA will be evaluated against the other methods.

Where:

Alberta-Innovates, Technology Futures

3608 33 Street NW
Calgary, AB T2L 2A6

When:

Friday October 22, 2010
from 9:00 AM to 4:00
PM MDT

[Add to my calendar](#)

Cost:

\$350 for Members of
