AWS IOWA 066 SECTION MEETING
KINZE MANUFACTURING
NOVEMBER 7, 2013

Meeting/Tour Agenda

4:30 PM—5:30 PM
Innovation Center
open for self-guided walk
through.

5:30 PM—6:00 PM
Dinner

6:00 PM—6:15 PM
Robotics Team
Presentation

6:15 PM—6:45 PM
Product Center
Tour—Brad Niensteadt

6:45 PM—8:00 PM
Innovation Center
and Production Tour:
History Video, KIC walk
through, Production tour,
4900 Building walk
through—Kinze Tour
Guides. (Maximum
number in tour group: 20)

KINZE MANUFACTURING
EXPERIENCE BLUE

INTEGRITY, CUSTOMER FOCUS, EXCELLENCE,
INNOVATION AND MUTUAL RESPECT

It was 1965 when a 21-year-old farm boy named Jon Kinzenbaw took out a small bank loan and opened his own welding shop in Ladora, Iowa. By 1971, his first major innovation—a single-axle, low-profile grain cart with giant high-flotation tires—had revolutionized the grain handling industry.

Kinze Manufacturing Inc. was founded on the premise that innovation can improve a grower’s way of life. Today, the privately held company and its approximately 800 employees continue to innovate—designing and building durable, high quality planters and grain carts that help farmers do the job better.
