Judith and Daniel Caldwell are sculptors and public artists living and working in Seattle, Washington. They are both university-trained in foundry metal casting; Daniel at the University of Wisconsin, Oshkosh, and Judith at the University of Washington, Seattle. Together they operate the Caldwell Sculpture Studio, which includes their own resin sand foundry, using industrial production processes to create their cast and fabricated metal artwork in bronze, iron, aluminum and stainless steel for incorporation into private, commercial, and public building projects.

Judith and Daniel met in 1997 at the Pratt Fine Arts Center, where Judith was teaching a class in sand casting, and Daniel was employed as the technician in charge of the Sculpture Studios. They began working as a team soon after, and were married in the summer of 1998. Together they operate a large metal casting and fabrication studio. Since that time, they’ve completed projects ranging from a cast bronze drinking fountain for the Seattle Aquarium, to a stream of 347 cast bronze fish traveling 850 feet down an airport concourse, to three monumental cast bronze, iron and stainless steel sculptures in the garden of a civic transportation center. Their latest projects include a 7’ tall revolving bronze throne themed on Mount Rainier, and the “Blue Sky Baskets,” three large sculptures for a civic plaza in White Center. They received Seattle Homes and Lifestyles Magazine’s Design Achievement Award in 2005 for their public art works.
